****SCENARIO TIME LIMIT: 50 MINUTES MAXIMUM TO COMPLETE ALL STAGES**
****PROPER ATTIRE REQUIRED**
****ABSOLUTELY NO RUNNING IS ALLOWED**
*****PHYSICAL AGILITY START TIME:**
1. TEAMWORK. Maximum time allowed is 10 minutes.

Instruction: One candidate will be paired with an evaluator for a team of two. The team will lift the 175lbs rescue mannequin from the ground and place on to a stair chair. The mannequin must be safely fastened into the stair chair with provided straps and/or safety belts. The team will then use proper form and maneuver the stair up one flight of stairs using carrying handles on the stair chair. Once at the top of one flight of stairs, team members will switch positions and descend the flight of stairs maneuvering the stair chair. The team will then move the rescue mannequin from the stair chair onto a canvas flat. The rescue mannequin will be secured with straps and/or safety belts provided. The rescue mannequin will be in the supine position. The flat and rescue mannequin will be lifted and placed onto an ambulance cot and secured. The cot will be wheeled 25 feet from "Point A" to "Point B". The candidates will then return the cot 25 feet to the starting position, lower the cot, remove the canvas flat/rescue mannequin and place it onto the ground. **Start time will begin with the candidates' first attempt to place the rescue mannequin onto the stair chair at the direction of the evaluator. The station time will end when the candidate has returned the mannequin to the start position**

Pass Criteria

- Yes No The candidates complete the station within the 10 minute time limit.
 Yes No The rescue mannequin remains secure on equipment during movement.
 Yes No Proper technique and safety straps, handles and /or belts are used as instructed.

Critical Criteria (check all that apply):

- The candidates are unable to perform the task(s).
 The mannequin is dropped.
 The evaluator determines the candidate(s) unfit to continue.

Evaluator -2					
Evaluator -3					

2. CARDIO WALK. Maximum amount of time allowed is 15 minutes.

Instruction: The candidate is to walk a designated route of one mile. The candidate will also wear a weighted vest of 25lbs. **Start time will begin with the candidate crosses the start line and end when the candidate completely crosses the finish line with both feet under his/her own power.**

Pass Criteria

- Yes No The candidate completes the station within the 15 minute time limit.

Critical Criteria (check all that apply):

- The evaluator determines the candidate is unfit to continue

Evaluator -1					
Evaluator -2					

3. CHEST COMPRESSIONS. Station time is 5 minutes.

Instruction: The candidate must perform continuous chest compressions as demonstrated for 5 minutes. An adult CPR mannequin will be placed flat on the floor or ground and the candidate must kneel down to perform the chest compressions. **Start time will begin with the evaluator advises the candidate to “begin compressions” and end when the evaluator advises the candidate to “stop compressions”.**

Pass Criteria

- Yes No The candidates complete the station within the 10 minute time limit.
- Yes No Proper technique and performs continuous chest compressions as demonstrated for 5 minutes.

Critical Criteria (check all that apply):

- The candidates are unable to perform the task(s).
- The mannequin is dropped.
- The evaluator determines the candidate(s) unfit to continue.

Evaluator -2		

4. RESCUE MANNEQUIN DRAG. Maximum time allowed is 2 minutes.

Instruction: The rescue mannequin used in this stage will be 175lbs. The candidate will pick up the rescue mannequin from the back by squatting down and reaching around the rescue mannequin with both arms under the mannequins arms – performing a “bear hug”. The candidate will then lift the mannequin enough so the buttocks of the mannequin are not touching the ground and drag the rescue mannequin 50 feet by walking backwards from “Point A” to “Point B”. Proper technique must be used to drag the rescue mannequin. The candidate **MAY NOT** drag it by the collar, arms, or any other part. The buttocks of the rescue mannequin must be off the ground but the feet **may (but do not have to)** drag. The candidate is allowed to place the rescue mannequin on the ground briefly (less than 5 seconds) **ONLY ONCE** for hand reposition after time has started. Start time begins as soon as the candidate is in position and lifts the mannequin’s buttocks off the ground at the direction of the evaluators. A mannequin drag harness may be used (if available). **Start time begins as soon as the candidate is in position and lifts the mannequin’s buttocks off the ground at the direction of the evaluators. Start time will end when the candidate and mannequin crosses “Point B” under his/her own power.**

- Yes No The candidate completes the station with thin the 2 minute time limit.
- Yes No The candidate drags the rescue mannequin properly as instructed.
- Yes No Proper technique and safety straps, handles and /or belts are used as instructed.

Critical Criteria (check all that apply):

- The candidate is unable to perform the task.
- The rescue mannequin is dropped.
- The rescue mannequin is placed on the ground more than once or longer than 5 seconds.

Evaluator -1		
Evaluator -2		

5. EQUIPMENT CARRY. Maximum time allowed is 3 minutes.

Instruction: The candidate is to carry one equipped medical kit and one ECG monitor up five flights (stories) of stairs and back down. The medical kits shall have handles and/or straps and be in good repair. The maximum weight for the kit and monitor combination shall be no more than 50lbs and minimum of 40lbs. The candidate will carry the equipment in proper form by the handles or straps, ascend the stairs, turn directly around and descend the stairs. The candidate is allowed to place the equipment on any surface briefly (less than 5 seconds) ONLY ONCE for hand reposition after time has started. Start time begins as soon as the candidate lifts the equipment off the floor at the direction of the evaluator. **Start time will begin with the candidate lifts the equipment off the floor at the direction of the evaluator and end when the candidate places both feet on the ground after stepping off the final step.**

Pass Criteria

- Yes/No The candidate completes the station within the 3 minute time limit.
- Yes/No The candidate carries the equipment in the proper manner as instructed.
- Yes/No Proper technique and safety straps, handles and /or belts are used as instructed.

Critical Criteria (check all that apply):

- The equipment is dropped.
- The equipment is placed on any surface more than once or longer than 5 seconds.
- The evaluator determines the candidate unfit to continue.
