**ACTION ITEMS**

There were no action items

**INFORMATION / DISCUSSION ITEMS**

Doug welcomed all attendees to the meeting, thanking the members of Idaho Mountain Search and Rescue for hosting the event. He then provided a brief overview of the agenda.

- **Update on regional preparedness priorities identified through recent training and exercise events.**

Joe Lombardo provided an overview of regional preparedness priorities developed following the recent Complex Coordinated Attack T&E held in July. He also spoke to the PIO JIC/JIS training and exercise conducted earlier in the spring, sharing that a new media platform was utilized making the exercise feel more real. In the course of Joe's update a discussion was had by several attendees about the ongoing desire for a school shooter exercise, noting the many nuances of this type of exercise in a school environment.

Joe went on to share that at the upcoming spring LEPC meeting he anticipates that an exercise will take place utilizing the same software platform used in the PIO JIC/JIS exercise.

- **Update on 2016 All Hazard Mitigation Plan and current/future planning projects.**

Crash Marusich gave an update to the attendees on the progress made with the 2016 All Hazards Mitigation Plan. He stated that the project is coming to an end with an anticipated December 2017 rollout. He then shared that the inundation mapping of the Boise River between Star and the Glenwood Bridge was completed and available for viewing. He gave a

quick overview of the 1.6 million dollars in mitigation grants funds that are available and the types of projects these funds could benefit.

- **Open Forum/Project Updates/Future Meeting Topics**

A more lengthy discussion took place regarding the potential for an active shooter exercise either by ACEM or another partner in the LEPC. Attendees spoke about working more regionally with each other both in training and in exercise ventures with Keith from USACE offering to host an event in the future.

The meeting adjourned at 4:20 p.m. with a tour of the IMSAR facility following.
