Certification of Materials for Disposal

Businesses in Idaho are required to determine whether waste they generate or dispose of is hazardous. Waste that is hazardous must be properly disposed of in accordance with federal, state, and local requirements. Businesses should utilize information from Safety Data Sheets, Product suppliers, EPA, DEQ and analytical testing labs to evaluate the waste they generate or plan to dispose of. For questions regarding hazardous waste please reference, <http://www.deq.idaho.gov/waste-mgmt-remediation/hazardous-waste/> or call the Boise Regional office at 208-373-0550

I _____ certify the materials that will be brought to the Ada County Landfill; located at 10300 Seamans Gulch Road, are only generated from within Ada County and those disclosed on the submitted and approved analytical report(s), which I have attached to this certification. No other similar materials that require testing will be brought to the Ada County Landfill without first providing new analytical report(s) for approval. Additional sampling, analytical results or other compulsory steps for approval for disposal at Ada County Landfill are the responsibility of your business or agency.

I certify this is the type of material which may be disposed of at a municipal solid waste landfill subject to that facilities approval and is not hazardous and is not subject to any Environmental Protection Agency, Department of Environmental Quality, Central District Health or any other regulatory restrictions or orders.

NOTE: If the material is or was at any time subject to orders or restrictions, all of the information must be provided to the Ada County Landfill for review and approval. At minimum, a letter releasing the material from any order or restriction is required prior to disposal for review and approval. Any misrepresentation or falsification of provided reports, analytical results, orders, restrictions or other documents may result in the denial of future services, order for removal of the offending material(s) at your expense and/or other actions by Ada County, DEQ, and EPA.
