## **Ada County Offers Discount Prescription and Health Program**

*Residents can now access low-cost telemedicine services and increased prescription discounts*

**BOISE** – For people who need prescription drugs to manage serious health concerns, not being able to afford your medication can cause a spiral of negative health outcomes. Having healthy residents affects not just the individual but the entire community as well.

That's why Ada County Commissioners have signed on to a program that offers discounts on health and dental services for residents of our community who need assistance. **The Live Healthy Discount Program** is made available through the National Association of Counties (NACo). Residents may visit [www.LiveHealthyCard.com](http://www.LiveHealthyCard.com) to enroll and access discounts on prescriptions, health services and dental care as well as download or print their new Live Healthy Card. The Live Healthy program is NOT insurance.

"As a county commissioner I have witnessed firsthand how limited access to prescription drugs and healthcare affects our court system, the people who rely on county services and the individuals attempting to provide those services," said Ada County Commissioner Kendra Kenyon. "For those who do not have employee provided healthcare, a discount on prescriptions and healthcare can literally be a lifeline."

The Live Healthy Discount Program gives residents access to:

- 24/7 telemedicine services provided through the low-fee Health Discount Program. This includes unlimited calls with a clinician without a co-pay.
- An average of 30 percent savings on prescriptions for resident and their pets through the NO-COST discount program.

"We are pleased to help counties alleviate residents' everyday health expenses, especially when so many families are struggling to keep up with rising healthcare costs," said Ada County Commissioner Ryan Davidson.
